MT series

Summary

Description	Page
Ordering details	2
Technical data	4
A.C. Electric motors	7
Central manifolds	8
Gear pumps	9
Oil tanks	10
Mounting position	14
Modular stackable elements	16
Coils	28
Connectors	29
Accessories	30

Ordering Details for Compact Power Modules MT

Power Module Type MT										Accessories: If needed select the additional Accessories. (See pag.30-31)									
Power Module Type of Motor Without motor = 0 With 3ph motor = 2										Coil Voltage and Connector: In case of selection of modular stackable elements with Solenoid Valve choice the required coil Voltage and the required Connector. (See pag.28-29)									
A.C. Electric Motor In the Power Module MT type is possible to assemble every code of AC Compact Mounting Style motor shown in the catalogue. (See pag.7)										Modular Stackable Elements: If needed select the additional Modular Stackable Elements. (See pag.16-27)									
Junction Elements TMT (See pag.7)										Mounting Position and Mounting Brackets: Select the required working position of the Power Module and Oil Filler cap in case of mounting position V1. If needed select the Mounting Bracket (See pag.14-15)									
Central Manifold with Pressure range Relief Valve + Request Setting of the Relief Valve in Bar: Select the required pressure range of the Relief valve and put the required setting in bar beetwen bracket. (See pag.8)										Oil Tank: Select the required Oil Tank. (See pag.10-13)									
										Gears pump: Select the required pump. (See page 9)									

Example of Ordering Details for Compact Power Modules MT

General Technical Data for Compact Power Module MT series

With this catalogue DCOC introduces the "compact power module" (CPM) MT type developed for clamping operation in Machine Tool. The CPM is an assembly of electric motor, central manifold with valves, pump, oil tank and a few modular elements able to cover the most parts of the schemes needed for this kind of application. The MT model is characterized by low noise level and a very space-saving design due to the direct assembly of the motor and modular elements to the central manifold.

Hydraulic details

- Max Flow rate Qup to 20 L/min
- Max Intermittent pressure P2.....up to 250 bar
- Max Peak pressure P3up to 270 bar (with a reduced number of cycles depending of pump size)
- AC Motors power range.....0.55 - 2.2 kW
- AC Motors protection classIP54
- Gear pumps displacement1.25 - 7.4 cc
- Tank volume.....up to 20 L
- Average Duty cycleS3 (intermittent operation) 60% (except for the 2.2 kW)

Power module selection

- Choose the circuit which meets your application requirements.
- Take note of all dimensions resulting from the basic components chosen for your application.
NOTE: dimensions may vary slightly and should be confirmed by DCOC if the assembly is to be installed in a space with narrow clearance.
- The tank capacity and the tank dimensions need to be large enough to assure proper pump suction: there must always be a reserve of oil in the tank when all cylinders are fully extended and avoid overflow when cylinders are fully retracted.
- The tank must be evaluated also for best separation of air from oil, and for settling down oil contamination. It should be placed in a space with, at least, natural ventilation and it should permit enough heat dissipation to prevent high fluid temperature.
- Select the electric motor by evaluating the power needed and the motor compliance with the heat developed during the expected run time (or "duty cycle").

Hydraulic fluid for compact power module

Mineral oil based hydraulic fluids suitable for hydraulic systems can be used; they should have physical lubricating and chemical properties as specified by:

- MINERAL OIL BASED HYDRAULIC FLUIDS HL (DIN 51524 part 1)
- MINERAL OIL BASED HYDRAULIC FLUIDS HL P (DIN 51524 part 2)

For use of environmentally friendly fluids please consult DCOC.

Fluid viscosity, Temperature range of the operating fluid, Ambient temperature

The fluid viscosity should remain within the range 10 to 300 cSt (centistokes); recommended 15 to 120 cSt .

Permissive cold start viscosity is maximum 2000 cSt .

The fluid temperature should remain within the range -15°C and 70°C [5°F and 158°F].

Ambient temperature -15°C +40°C [5°F and 104°F].

Fluid cleanliness requirements and maintenance

We recommend a cleanliness of the operating fluid according to ISO 4406 Class 19/17/14 or cleaner.

All components of the hydraulic circuit , including hoses and actuators, must be flushed and cleaned before assembling, because the compact power module has a suction filter only.

The hydraulic fluid should be replaced after the first 50 hours, and then every 1000 hours, or, at least, once a year.

General Technical Data for Compact Power Module MT series

Power module installation

The mounting position is basically un-restricted; just avoid installations that could compromise the pump suction. It is recommended to support the power module on vibration dampening blocks when the mounting structure is expected to vibrate.

Do not assembly the CPM to moving part. Finish required on mounting surface 0.3 mm over 140 mm lenght.

Wiring and starting-up

The wiring between power source and electric motor should be selected in order to avoid excessive voltage drop.

It is strictly forbidden to allow the backwards rotation of the pump even at the first starting: to prevent reverse rotation, the wiring polarities must be correctly connected.

Caution: when energized, the surface temperature of the electric motor could reach temperature levels of 60-80°C [140-176°F]; care should be taken to avoid any accidental contact of people with the motor surface.

A.C. Motors

The tolerances on the nominal voltage are:

Three phase motor: 230-400V +/-10%.

Protection degree : IP54 (protection against dust and water splash).

Insulation class: F (155°C) [311°F].

All motors are aluminum alloy die cast without painting.

Central Manifolds

The Central Manifold is made of extruded aluminum alloy AL 7020 (AlZn4.5Mg UNI9007/1). The validation of the Central Manifold follows a life-test with 250 bar [625 psi] pulsed pressure repeated for 500.000 cycles.

External Gear Pumps

All the pumps are pressure compensated with cast iron covers to guarantee the best efficiency and durability. The splined shaft guarantees a big number of start and stop cycles without failure or wearing. The validation of the pumps follows a life-test at P2 (intermittent max pressure) pulsed pressure repeated for 500.000 cycles.

Oil Tanks

In this catalogue you will find a wide selection of plastic tanks available as a standard product. Plastic tanks are obtained in one piece in order to avoid welded parts that are weak points at extreme temperature and vibrations. Plastic tanks are suitable for operating temperature range -15°C / +70°C [5°F / 158°F].

Note: even if the plastic tank mounting system is designed to avoid oil leakage the tank must be securely anchored when subject to shocks and heavy vibrations. Please check that the anchorages do not stress or deform the tank.

Steel tanks are available on request and with a minimum of quantity. Please contact our Sales Department.

Modular Stackable Elements

Our modular system offers a wide range of standardised elements.

All the Modular Elements are made of extruded aluminum alloy AL 7020 (AlZn4.5Mg UNI9007/1). In the catalogue you will find a selection of the main used models.

The validation of the Modular Elements follows a life-test with 250 bar [625 psi] pulsed pressure repeated for 500.000 cycles.

Note: To reduce the complexity of the system and optimize the available space, special Modular Elements can be designed and manufactured following the customers needs. In this case please contact our Sales Department.

European machine directive 2006/42/CE

According to the Machine Directive 2006/42/CE, a complete power module, as described in paragraph 15 and made available to the European market, enters into the definition of "partly completed machinery".

Instead, the power module sub-assemblies (motor, pump, reservoir, central manifold,...), when not assembled into a complete power pack, are considered "components" which can be employed in a "machinery" or a "partly completed machinery". In this case, the DCOC components and sub-assemblies must be fitted in compliance

General Technical Data for Compact Power Module MT series

with all the relevant technical data sheet applicable to the product, and shall not be operated, adjusted or disassembled before the complete machinery where they are incorporated has been declared to be in compliance with the Machine Directive 2006/42/CE.

Note: All the components shown in the catalogue ARE NOT suitable for use in potentially explosive atmosphere.

Technical information

Below you will find the most common equations used in hydraulics:

	Flow	Operating pressure	Internal diameter hydraulic cylinder	Area of hydraulic cylinder	Piston force	Drive shaft	Power requirement for motor	Pump displacement	Torque requirement
Common Units	l/min	bar	mm	mm ²	N	rev/min	kW	cm ³ /rev	Nm
Symbols	Q	P	d	A	F	n	N	D	M
Equations	$Q = \frac{D \times n}{1000} \times 0,95$	$P = \frac{F}{0,1 \times A}$	-	$A = \frac{\pi \times d^2}{4}$	-	-	$N = \frac{P \times Q}{612}$	-	$M = \frac{D \times P}{62,8 \times 0,87}$

A.C. Electric Motor Compact Mounting Style for Power Module Type MT

These motors are designed to reduce the overall dimensions and the cost of the junction elements.

Three Phase Current Motors 230/400V 50Hz IP54 Size IEC 80

Code	Type	Material Number	Power (kW)	Power (hp)	Poles	Rpm at 50Hz	Duty Cycle	Thermal Switch

The motors shown in these tables are a selection of our range.

In case of needs of different technical characteristics PLEASE CONTACT OUR SALES DEPARTEMENT.

NOTE: The electric motors shown in this pages are delivered by different certified suppliers.

This means the indicated dimensions could change a little, depending on which manufacturer will be assembled.

On the CPM the choice of the manufacturer is based on our stock availability.

Mounting Brackets

Support for Manifold MT series

Code	Central manifold	Type	Material Number		
GMT	MT	K01F331528000	R932011175		

Modular Stackable Elements

MTA01

Note: For 3/2 KSDE solenoid valve check data sheet RE18136.

Code	Description	Max Working Pressure bar [psi]	Max Flow l/min [gpm]	Type	Material Number
MTA01	Kit MTA01 Modular block	250 [3626]	12,0 [3,17]	0985900017	R932008163

Mounting Example

Modular Stackable Elements

MTA02

Note: For 3/2 KSDE solenoid valve check data sheet RE18136.

Code	Description	Max Working Pressure bar [psi]	Max Flow l/min [gpm]	Type	Material Number
MTA02	Kit MTA02 Modular block	250 [3626]	12,0 [3,17]	0985900021	R932010931

Mounting Example

Modular Stackable Elements

MTA03

Code	Description	Max Working Pressure bar [psi]	Max Flow l/min [gpm]	Type	Material Number
MTA03	Kit MTA03 Modular block	250 [3626]	20,0 [5,28]	0985900011	R932007989

Mounting Example

Modular Stackable Elements

MTA04

Code	Description	Max Working Pressure bar [psi]	Max Flow l/min [gpm]	Type	Material Number
MTA04	Kit MTA04 Modular block	250 [3626]	20,0 [5,28]	0985900018	R932008172

Mounting Example

Modular Stackable Elements

MTD01

Use Coil Model K4

Note: For 3/2 KSDE solenoid valve check data sheet RE18136.

Code	Description	Max Working Pressure bar [psi]	Max Flow l/min [gpm]	Type	Material Number
MTD01	Kit MTD01 Modular block	250 [3626]	12,0 [3,17]	0985900001	R932007956

Mounting Example

Modular Stackable Elements

MTD02

Code	Description	Max Working Pressure bar [psi]	Max Flow l/min [gpm]	Pressure Stage	Type	Material Number
MTD02/1	Kit MTD02/1 Modular block with pressure reducing valve	250 [3626]	12,0 [3,17]	Pressure setting up to 100 bar [1450]	0985900002	R932007965
MTD02/2	Kit MTD02/2 Modular block with pressure reducing valve	250 [3626]	12,0 [3,17]	Pressure setting up to 210 bar [3046]	0985900003	R932007966

Mounting Example

Modular Stackable Elements

MTD03

Note: For 3/2 KSDE solenoid valve check data sheet RE18136.

For KRD pressure reducing valve check data sheet RE18111.

Code	Description	Max Working Pressure bar [psi]	Max Flow l/min [gpm]	Pressure Stage	Type	Material Number
MTD03/1	Kit MTD03/1 Modular block with pressure reducing valve	250 [3626]	12,0 [3,17]	Pressure setting up to 100 bar [1450]	0985900005	R932007974
MTD03/2	Kit MTD03/2 Modular block with pressure reducing valve	250 [3626]	12,0 [3,17]	Pressure setting up to 210 bar [3046]	0985900006	R932007975

Mounting Example

Modular Stackable Elements

MTD04

Use Coil Model K4

Note: For 3/2 KSDE solenoid valve check data sheet RE18136.

For KRD pressure reducing valve check data sheet RE18111.

Code	Description	Max Working Pressure bar [psi]	Max Flow l/min [gpm]	Pressure Stage	Type	Material Number
MTD04/1	Kit MTD04/1 Modular block with pressure reducing valve	250 [3626]	12,0 [3,17]	Pressure setting up to 100 bar [1450]	0985900008	R932007983
MTD04/2	Kit MTD04/2 Modular block with pressure reducing valve	250 [3626]	12,0 [3,17]	Pressure setting up to 210 bar [3046]	0985900009	R932007984

Mounting Example

Modular Stackable Elements

MTD08

Code	Description	Max Working Pressure bar [psi]	Max Flow l/min [gpm]	Type	Material Number
MTD08	Kit MTD08 Modular block	250 [3626]	20,0 [5,28]	0985900012	R932007997

Mounting Example

Modular Stackable Elements

RT60

Code	Description	Max Working Pressure bar [psi]	Max Flow l/min [gpm]	Pressure Stage	Type	Material Number
RT60/05	Kit RT60/05 Modular block with pressure reducing valve	250 [3626]	20,0 [5,28]	Pressure setting up to 10-50 bar [145-725]	0985900020	R932008367
RT60/08	Kit RT60/08 Modular block with pressure reducing valve	250 [3626]	20,0 [5,28]	Pressure setting up to 28-80 bar [406-1160]	0985900019	R932008361

Mounting Example

Modular Stackable Elements

MTF01

Code	Description	Max Working Pressure bar [psi]	Max Flow l/min [gpm]	Type	Material Number
MTF01	Kit MTF01 Modular block	250 [3626]	15,0 [3,96]	0985900022	R932011139

Mounting Example

Modular Stackable Elements

MT

Code	Description	Type	Material Number
MT	Kit MT Closing plate	0985900016	R932008159

Mounting Example

Coils

K4

Code	Connection	Voltage	Material Number
OB	03-pin (2+PE) DIN EN 175301-803	12 V	R900991678
OC	03-pin (2+PE) DIN EN 175301-803	24 V	R900991121

S8 (only for Modular Block RT60)

Code	Connection	Voltage	Material Number
OB	DIN 43650 - ISO 4400	12 V	R901090821
OC	DIN 43650 - ISO 4400	24 V	R901083065

Connectors

CONNECTOR IP67 - EN175000 (DIN 4350-A) / ISO 4400

Ambient temperature - Standard	°C [°F]	- 20 to + 60 [-4 to +140°F]
Type of protection according to DIN 40050		IP67 with cable socket mounted and locked
Operating voltage	V	Choose the proper ordering code according to the circuit
Maximum operating current - Standard	A	16
Number of pins		2 + PE
Clamping range for cables having an outer diameter of	mm [inch]	5, up to 10 [0,2 up to 0,4]
Cable entry		Pg9 / Pg11 (unified)
Maximum cable cross-section	mm² [inch²]	1.5 [0,002]

Standard Circuit

Code	Colour	Cable entry	Type	Material Number
WC	Without Connector			
CS	black	Pg9 / Pg11	OD016901000000	R934004344

Accessories

Isolator

Code	Description	Type	Material Number
ES00	Straight isolator	EM 14	R932500182
ES90	90° isolator	EM 14 T	R932500184

Manometer

Code	Description	Pressure range bar [psi]	Type	Material Number
MN60	Pressure gauge	0-60 [0-870]	C163016000	R932000581
MN100	Pressure gauge	0-100 [0-1450]	C163017000	R932000582
MN160	Pressure gauge	0-160 [0-2320]	C163018000	R932000583
MN250	Pressure gauge	0-250 [0-3626]	C163019000	R932000584
MN315	Pressure gauge	0-315 [0-4568]	C163020000	R932000585

Accessories

Pressure Switches

PLEASE NOTE: if you need a electronic pressure switch please refer to the data sheet RE 30279/10.08

Accumulator

PLEASE NOTE: if you need an diaphragm-type accumulator please refer to the data sheet RE 50150/01.2013
